INSIDE AND OUTSIDE APPLICATION

REFLECTIV has developed coating films with premium quality color patterns. A special adhesive treatment allows easy installation on flat surfaces, which makes it easier to print and cut

INFORMATION

MATERIAL:PET
ADHESIVE:.....Polymer acrylic
LINER:.....90 microns
TOTAL THICKNESS:.....Between 200 and 235 microns
INK TYPES:.....UV / eco-solvent / solvent / latex
APPLICATION FACE :Inside and outside
APPLICATION T°:.....min, + 5°C
FIRE RATING:..... B-S1, D0
STANDARDS:.....EUROCLASSES
WARRANTY:3 years inside, 2 years outside

DIMENSIONS

1,27 x 2,5 m
 1,27 x 5 m
 1,27 x 10 m
 1,27 x 30 m

Application's instructions

Application's video

Application Method

The glass surface to be glued on has to be free from dust, grease or other contaminants. Some specific materials such as polycarbonate can cause air bubble problems. Therefore, a compatibility test is recommended. For more precision we recommend to refer back to the application table.

Production and standards

In order to constantly improve our production we may change a product colour and manufacturing process without prior notice. Before applying our products we recommend that our users ensure that the film is suitable for the intended use and comply with current standards.

Durability: from 12 to 15 years for vertical application in central Europe.

Use: Reflectiv window films are designed for use on any type of clear normal glass.

Maintenance after 30 days: with usual cleaning solutions (non-abrasive, without ammonia...). Cleaning products that may scratch the film should be avoided.

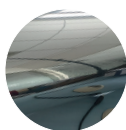

Storage: 2 years from delivery. This film should be kept away from excessive humidity and sun rays, at temperatures below 38°C.

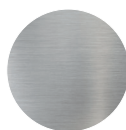

In order to constantly improve our production we may change a product colour and manufacturing process without prior notice.
