DTF PREMIUM

Transfer film for DTF printing

Technical specifications

- Thickness: 75 microns
- Matte film with a matte print finish
- Non-adhesive backing and antistatic reverse side
- Instant peel: remove the liner while hot
- Application temperature up to 160°C, depending on the adhesive powder used
- Withstands over 50 machine-wash cycles at 40°C
- Recommended actual oven temperature: up to 150°C
- Consistent film tension across every production batch

Instructions for use

1. **Printing**
   Print in mirror image on the side marked “printable side”
2. **Applying the adhesive**
   After application, remove excess powder to prevent residue during transfer
3. **Curing the ink / melting the adhesive**
   Set the oven temperature according to the adhesive manufacturer’s instructions
4. **Heat transfer onto the fabric**
   10-15 seconds at up to 160°C, depending on the adhesive powder; medium pressure
5. **Removing the liner**
   Peel hot (instant peel), warm or cold

Washing recommendations

- Wash at temperatures up to 40°C
- Iron inside out
- Tumble dry using the synthetics cycle
- Do not dry clean

Storage recommendations (roll)

- Storage life: up to 2 years
- Storage temperature: 18°C to 26°C
- Keep away from dust and direct sunlight
- Store vertically

Notes

- We recommend carrying out a transfer test before starting mass production
- Wait 24 hours after application before the first wash
- Follow the care instructions inside the garment
- Do not use bleach or other harsh chemicals

Certifications

- The material complies with the REACH regulation
- The material is VEGANOK certified
- The material is made using raw materials compliant with OEKO-TEX standards
- The coated material is made using chemicals compliant with the ZDHC MRSL
