

# SOLAR FILMS

## IR 50X SUN PROTECTION

INFORMATION

### EXTERNAL APPLICATION

**REJECTION OF INFRA RED 62%**  
**HEAT PROTECTION**

### DESCRIPTION

IR 50X has been designed to be applied to glazing to reduce heat from the sun. Unlike most solar protection films, IR 50X has no mirror effect. It lets 60% of visible light through and does not alter the exterior appearance of the building. Ideal for airports, monuments etc.

**SUSTAINABILITY** : 5 years for vertical applications in Central Europe.

**USE** : For all types of glazing.

**MAINTENANCE** : After 30 days with a standard cleaning solution (non-abrasive, ammonia-free, etc.). Do not use cleaning products that could scratch the surface.

**STORAGE** : 2 years from delivery. This film should be stored away from excessive humidity and sunlight, at a temperature below 38°C.

In order to meet the highest standards, we recommend that you do not mix films from different productions.

Application notes

### DIMENSIONS

BY ROLL :

1,52 x 10 m  
30 m

### METHOD OF APPLICATION

The surface to be bonded must be free from dust, grease or any other contaminant. Some materials, such as polycarbonate, can cause bubbling problems. A compatibility test is therefore recommended. Can be installed on plexiglass and polycarbonate.

### PRODUCTION AND STANDARDS

In order to constantly improve our products, we may modify colours and manufacturing processes without prior notice. Before applying our films, we recommend that users ensure that they are suitable for the intended use and comply with current standards.

### APPLICATION

CAN BE INSTALLED ON :

**SIMPLE**  
4 / 6 / 8 / 10 mm

**TOUGHENED**

**CLEAR DOUBLE GLAZING** < 1,20 M<sup>2</sup>

**38%**  
Infrarouges transmis

**60%**  
Transmission de lumière visible

**62%**  
Infrarouges rejetés

**40%**  
Lumière visible rejetée
